RF Over Fiber Systems
L-Band HTS RF over Fiber Links

50Ω DWDM Medium Power L-Band HTS

- L-Band HTS (700-2450MHz)
- Up to 500km systems available
- 1 to 96 channels per fiber
- Ideal for Ka-Band rain fade diversity
- 5mW Laser
- Standard 5-year warranty

ViaLiteHD DWDM L-Band HTS RF over fiber links use dense wavelength division multiplexer (DWDM) lasers and have been designed for the satellite industry to transport RF signals over long distances, enabling Ka-Band diversity or remote location of antennas up to 500kms away.

Due to the very wide dynamic range, the same link can be used in both the transmit or receive paths. This dynamic range allows High Throughput Satellite (HTS) transponder bandwidths of 500MHz, 800MHz or even 1500MHz to be transported, even over long distances. A full suite of DWDM accessories is available as well as system design, commissioning expertise and system setup.

The chassis cards are available with the ViaLiteHD blind mate option, which allows all cables to be connected at the rear of the chassis when installed. It also allows configuration changes to be completed without disturbing the connections and very fast changeover of cards; enabling five 9s reliability.

OPTIONS INCLUDE

- 50Ω electrical connectors: SMA and MCX
- Optical connectors: SC/APC, LC/APC, FC/APC and E2000/APC
- Test ports on Tx and Rx modules
- Built-in BiasT for LNB powering through RF connection
- LNB control circuit with 13/18VDC and 22kHz tone
- Blind mate connectivity (SC/APC and SMA)

APPLICATIONS

- Ka-Band diversity rain fade application
- Fixed satcom earth stations and teleports
- Gateway reduction within a satellite footprint
- Government installations
- Remote monitoring stations
- Leased fiber reduction

FORMATS

- 3U Chassis
- 1U Chassis
- Yellow OEM
- Outdoor enclosures

RF Over Fiber Systems

L-Band HTS RF over Fiber Link

**PRODUCT CONFIGURATOR**

**Module Type**
- R - Receiver (Optical in, RF out)
- T - Transmitter (RF in, optical out)

**Electrical Connector**
- 1 - SMA, 50
- 2 - MCK, 50

**Module Package**
- D - Chassis Electronic
- N - Yellow OEM Link

**Nominal Gain (dB)**
- 0 - 5
- 1 - 11
- 2 - 15
- 3 - 25

**Optical Connector**
- 5 - MX
- 6 - 75

**Frequency**
- L - L-Band HTS 700MHz-2450MHz

**Laser Type**
- D - DFB, DWDM, 5mW ±0.1nm
- E - DFB, DWDM, 12.5mW ±0.1nm

**Photonix**

**POPULAR PRODUCTS**

**HRT-L1-8D-50-DC33**
L-Band HTS (700-2450MHz) chassis plug-in High Power DWDM transmitter with built-in LNB power, 50 ohm SMA and SC/APC blind mate connectors

**HRR-L1-8D-03**
L-Band HTS (700-2450MHz) chassis plug-in transmitter, 50 ohm SMA and SC/APC blind mate connectors

**HRT-L1-6N-30-DC33**
L-Band HTS (700-2450MHz) Yellow OEM High Power DWDM transmitter with 50 ohm SMA and FC/APC connectors

**HRR-L1-8N-03**
L-Band HTS (700-2450MHz) Yellow OEM receiver with 50 ohm SMA and SC/APC connectors

* All tests @ 25°C after 15 minutes warm up
RF Over Fiber Systems
L-Band HTS RF over Fiber Link

ACCESSORIES

SNMP/Web Browser Card

- Easy to use graphical user interface (GUI)
- Real time monitoring of card performance
- Alarm monitoring and event logging
- Control of gain adjustment
- Compatible with all ViaLiteHD rack chassis and cards
- Easy integration with network management systems (NMS) using management information base (MIB) tables
- Actively manage redundancy switching
- New RF cards can be automatically reprogrammed with the previous card parameters
- Remote SNMP to local SNMP connection via optical fiber
- Provides remote LAN 10/100 Ethernet link

Dual Redundancy

- 1:1 redundancy for L-Band
- Maximises link up-time
- Can be used to backup copper coax
- Manual and automatic control via SNMP
- Flexible configuration options
- Other redundancy options available

Rack Chassis

- 3U accepts up to 13 RF or Support cards, plus an SNMP card and dual power supplies
- A 1U chassis accepts up to 3 RF or Support cards or 2 cards and an SNMP card (with dual power supplies)
- Up to 26 channels per 3U chassis (using dual RF cards) – reducing the amount of rack space required
- Blind mate option
- All modules hot-swappable and auto-reconfigure with SNMP option
- On-card LNB and BUC power options
- Power fed through rear chassis connector to card Bias Tees
- System can be monitored and controlled remotely via SNMP using a web browser

DWDM Systems

- DWDM multiplexers
- EDFAs
- Delay lines
- Optical switches
- Dispersion Compensation
- System design and configuration
- Remote link monitoring
